

## *Environmental & Infrastructure*

This is to obtain feedback if we need a focus on the various challenges/opportunities we face on the island.

We acknowledge there are already some self-starter community groups working on various projects but this is to see if there is wider interest to be involved.

For example:

- Wilding pines (currently MPI does not have a record of any wilding pines being present on Kawau)
- Public access roads; surface maintenance
- Native regeneration/planting
- Weed control (understand this would be part of any wider pest eradication programme but do we want to address this now rather than wait)
